MUSCLE BICYCLE - the Customaxxx Roar

Cruisin' down the streets in style used to be the terrain of Choppers, with their cool long handle-bars, and owned by the coolest kids on the block. Few have come close since then, until the Customaxxx was born! Created in the backyard of Singapore, this was the brainchild of Lim Boon Siong, who had a dream of making a super cool bicycle, scrapping the conventional design of bikes based on tubes and standard templates. What you see now is the Roar, his realized dream of a customized cruising bicycle, which wouldn't look small next to a hot rod bike like a Harley!

The Roar was created with one thing in mind - to cruise in absolute style. You sit low, long and wide on this beauty. The frame is precision crafted from 6061-T6 Aluminum and powder coated to midnight black. The Floating Swing Arms shows off the rear wheel and its mechanical bits in all its glory.

Only a very limited 100 Customaxxx Roar will be produced, each uniquely tagged, and it will not be repeated. So if you want to be one of the few in Malaysia to own one, you better get knocking on their doors soon!

This bike rolls on the widest wheels in the bicycle industry, all 24" by 100mm wide. Riding is made easy with Sturmey Archer 3-speed hub with shifting done in retro style. A pair of huge hydraulic disc brakes ensure you stop safely every time. Leading the front end is Customaxxx Ultra Beefy triple tree fork. It's clean and elegant lines finished in deep chrome simply oozes style and presence. **L.A.A.**

For details of the Roar or customising enquiries, email experience@ultimaxxx.com or visit www.ultimaxxx.com
